Alphabetical Scramble

The 26 words below are meant to name parts of a horse's body, but each one is missing a certain letter. In each case, it is a different letter of the alphabet. See if you can restore the correct letter to each word. For example, the hardest one, the letter *x*, is already done for you. If you add *x* to *coccy*, you create the word *coccyx*, which is the name of a bone in the horse's tail.
